

## betterair presents the only sustainable solution for a healthy indoor space

**betterair** has been the pioneer and market leader in the emerging arena of indoors bio-control method using the patented **Environmental Probiotics (Enviro-Biotics®)** solution.

Our illnesses are a resulted by contaminated indoor spaces where we spend more than 90% of our time and where indoors space is found to be way more polluted and dangerous than the outdoors.

**Enviro-Biotics®** harnesses the benefits of probiotics (beneficial bacteria) to restore the ecological balance of our indoor spaces in a safe manner for people and environments, creating a healthy and safe indoors free of pathogens – bacteria and mold, viruses, allergens, other various contaminants, and disease agents.

**Enviro-Biotics®** is the only effective and long-lasting way to reduce illnesses and to alleviate breathing disorders and allergic reactions.

**Enviro-Biotics®** is 100% safe, allowing to continuously disperse active microorganisms in our indoors with no harm to people and their environments. The products undergone every safety challenges over many years, and proved 100% safe with all aspect of safety including tests of toxicity with inhalation, touch of skins and eyes, swallowing, general sensitivities and more. No adverse effect has been registered during many years of exposure by tens of thousands of people

**Enviro-Biotics®** is the only effective and long-lasting way to reduce ARB (Antibiotic Resistance Bacteria), that responsible to millions of injuries a death in hospital, nursing homes and elsewhere. A growing number of bacterial diseases are becoming resistant to the antibiotics currently in use. If nothing is done, millions more could die as ARB may exceed cancer as a leading cause of death.

**betterair** offers a comprehensive and all-inclusive purification systems which ensure cleanliness of surfaces and objects (unlike air purifiers that do no treat surfaces and objects, but only air - therefore, not effectively addressing the real danger of the indoor), Recent studies show that the Covid-19 can sustain on surfaces for weeks.

Our versatile line of products caters a wide range our private, work spaces, where currently being applied across industries such as Health Care, Transportation, Hospitality, Schools, Shopping centers and other markets.

The results are that betterair protects you wherever you are and ensures reduction of:

- Transmission of infectious diseases including Covid-19
- Antibiotic Resistant Bacteria
- Allergic reactions & irritation, fatigue and coughing
- Allergens caused by dust mites and pets' danger
- Asthma attacks
- Bad odors
